RESEARCH AND CREATIVE ACTIVITIES SUMMARY

My current research interests / program include:

- Translation of HIV behavioral surveillance best practices to developing world contexts.
- Empirical evaluations of sampling methods for hidden and hard to reach populations.
- Developing novel sampling methods for hidden and hard to reach populations where the current standards of sampling are not appropriate.
- Investigating disparities in HIV infection within high-risk groups, including structural factors such as neighborhood conditions and contexts, economic conditions and social situations (e.g. sexual mixing, racism).
- Monitoring the HIV epidemic among high-risk populations worldwide (e.g. Asia, Africa)

- Population size estimation among high risk, hidden and hard to reach populations.
- Monitoring the HIV epidemic locally and providing data for monitoring and evaluation of programs.

TEACHING EXPERIENCE

MENTORING SUMMARY

I mentor or co-mentor a wide range of students primarily focused on public health, epidemiology and HIV/AIDS. Mentees include Masters, doctoral, post-doctoral and most recently a program for undergraduate students. Mentees have a wide range of goals when working with me. Some are fulfilling internship requirements while others are interested in working towards a first author publication. Mentees receive an overview of the history of HIV/AIDS, epidemiology, sampling methods, analytic methods and manuscript preparation. In the course of my mentoring activities students have published 18 peer reviewed publications as first authors. While most mentees are from academic institutions in the Bay Area a number come from institutions elsewhere in the US and international institutions.
